## UTG GALIL TACTICAL QUAD RAILS

MNT-HGGL01

Caution: Make sure firearm is not loaded. Clear the magazine and examine the chamber. Use safe handling procedures at all times.

1. Separate the pre-assembled mount and arrange all parts on a flat surface.

2. Turn forward the Locking Lever on the Front Holder (Cap) of the Handguard with a screwdriver. Move the Front Holder (Cap) forward to remove the spring, handguard, and the Rear Holder (Cap).

3. Move the Front Holder (Cap) to the original position and turn the Locking Lever backward to lock the Front Holder (Cap) on the barrel.

4. Place the 2 Barrel Spacers between the barrel and the gas tube at mid section as shown in 4. Tighten the 2 screws to lock the spacers firmly. Barrel Spacers must be installed to prevent over tightening of the top/bottom covers and to allow for normal operation of the piston.

5. Fit the Bottom Cover onto the barrel and make sure the fit is even and level.

6. Fit the Top Cover onto the gas tube. Make sure the 2 Connecting Walls of the Bottom Cover fit into the two Mating Channels of the Top Cover.

7. Evenly tighten all six screws to securely lock the top and bottom covers.

8. Put on the included rail covers if desired. Install Accushot scope and other excellent quality UTG flashlight/laser accessories.
